

Production and Logistics

Seminar International Logistics

Content

This bachelor level seminar deals with specific problems in International Logistics and will take place weekly on Thursday from 9 a.m.– 11a.m. in G22A-004. The assigned students are responsible to structure the contents of a text book chapter, include additional material taken from scientific papers, and be prepared to discuss and defend their results. While not entirely quantitative in its approach, participants are expected to have an appropriate level of mathematical knowledge and interest in the areas of operations management and business logistics.

Prerequisites: appropriate for 5th semester (or later) bachelor students

Credits: This seminar will give credit towards

- ▶ **BWL-Vertiefung Logistics & Operations Management**
- ▶ **IM-Ergänzung**
- ▶ **IBE: Compulsory elective modules**

Language: main seminar language will be English
