

## Production and Logistics

### Teaching - Lehre

Our teaching is primarily directed towards students in both Bachelor and Master programs enrolled at the Faculty of Economics and Management.

At the **Bachelor** level, we are offering a lecture on **Business Decision Analysis** which is part of the core program in the IBE (4th semester). In their 5th semester, students interested in the operations area (production and logistics), can choose the lecture **Introduction to Production Management** and the **Project Seminar: Quantitative Methods in Production and Logistics** as part of their elective studies. Although both being self-contained, these two modules can be chosen to complement each other. Also, in each semester a **Bachelor Thesis Seminar** can be taken.

At the **Master** level, we offer a **lectures on different topics or Masters Theses** covering various topics in the field of Production and Logistics.

For more details on lectures and **additional seminars** offered in the current semester as well as an outlook onto the next semester, see below.
