

Production and Logistics

Bachelor Thesis and Seminar

Content

Within the framework of a bachelor thesis, you work independently on a problem from the field of Production, Logistics, or Business Decision Analysis. An essential part of the work deals with literature search and applying solutions procedures known from the scientific literature. Several topics require skills in Spreadsheet Modeling or VBA programming.

Applies to:

- Bachelor (B. Sc.) International Business and Economics

Expected prior knowledge:

Interest in the management areas: Production Management, Management Science, or Decision Analysis. Highly recommend is : successful participation in related classes such as *Introduction to Production Management* or *Project Seminar: Quantitative Methods for Business*.

Registration:

The application is carried out centrally for students of the Faculty of Economics and Management. Information about the application and planning can be found on the website of the › Dean's Office of Study Affairs

(http://www.fww.ovgu.de/fww/en/Teaching/Dean_s+Office+of+Study+Affairs-p-1164.html) .

List of Topics: Topics will be from the fields of Production Management, Management Science, and Decision Analysis.
