

Production and Logistics

Seminar in Production and Logistics

Content

This **bachelor level** seminar will take place weekly on **t.b.a.** The assigned students are responsible for structuring the contents of an introductory text, include additional material from other scientific sources, apply the methods and concepts learned to own examples, and finally be prepared to discuss and defend their results. While not entirely quantitative in its approach, participants are expected to have an appropriate level of mathematical knowledge.

Prerequisites: appropriate for 5th semester (or later) bachelor students

Credits: This seminar will give credit towards

- ▶ IBE (new) Compulsory elective modules (International Business)
- ▶ IBE (old) Compulsory elective modules

Language: Seminar language will be English

Next time offered in: t.b.a.
